F.A.Q.

Why do I need FlightCheck Online?

- 24 Hour Preflighting Availability
- Delivers Fully-Collected, Print-Ready Jobs
- Creates an Unclogged workflow
- Desktop Drag & Drop Simplicity
- Immediate Pass or Fail Results

What is FlightCheck Online?

FlightCheck Online checks digital files against customized preflight rules sets defined by Huston Patterson. The sender is automatically notified of required corrections before the job is transmitted and instantly receives confirmation when it is accepted. The Customer may not alter the preflight rules sets in any way.

When the preflight is completed, FlightCheck Online will automatically collect all available necessary files including elements such as fonts and images. The collected job is then compressed and can be uploaded to our FTP server.

With FlightCheck Online you can quickly and easily check, collect, compress, and send your job over the Internet to us.

Many common desktop publishing documents can be preflighted with FlightCheck Online.
